

## Milestone #2

### *Project Management Tools*

We used Trello to create our project management plan.

<https://trello.com/b/F1NMQKbm/project-progress>

### *Scrum Process*

#### *Sprint 1: Basic User-Interface*

-Goal: Goal of current sprint is to create a user-friendly interface that takes in user input on the main page and posts it accordingly to the forum.

- Task 1: Create main page with simple question/answer forum - Nestor & Javier & Tyler
- Task 2: Create subpages based on different subjects - Tanya & Braden
- Task 3: Stylize website - Tanya & Braden
- Task 4: Implement Javascript to have functionality - Nestor & Javier & Tyler

Deadline: November 2nd

#### *Sprint 2: Back-End Features (Database)*

-Goal: Make the backend with MySQL and PHP so that we can save usernames and questions/answers in order for users to see them

- Task 1: Create database
- Task 2: Create all the different sub-tables that include usernames, questions with their specific tags and titles, and voting system
- Task 3: Connect HTML page with PHP so that the site can communicate with the database

#### *Sprint 3: Connecting to Server and Testing*

-Goal: Connect the website to a server so that we can test it with people other than ourselves to make sure everything works properly

- Task 1: Host website on a server
- Task 2: Have people connect to and test the website to make sure everything works smoothly
